

# Be Prepared When the **Power Goes Out**

Like all mechanical equipment, your whole home generator needs routine preventative maintenance to run properly when you need it most. That's why manufacturers recommend regularly scheduled service every 6 months to a year.

**Call Virginia Power Solutions today and you'll be prepared!**

Our comprehensive inspection and tune-up focuses on these key components, including:

- » Belts
- » Coolant and Oil Levels
- » Fuel Lines
- » Exhaust System
- » Wiring System
- » Battery and Transfer Switch

**Maintain your generator today and  
be ready for what's coming tomorrow.**
